RSVP: Please send your RSVP no later than Monday 15 July

RINA QLD Annual General Meeting

RINA Queensland is pleased to invite all RINA QLD members to its AGM to be held on Tuesday the 16th of July at Stella Marine training room. Members wishing to attend via zoom are kindly asked to make this clear to our secretary Tom Ryan in their RSVP that this is the case, as the zoom link for the AGM will be sent separately. For those attending in person we ask that you are punctual to ensure a timely start and prevent from delaying the technical presentation.

The AGM will cover annual reports and a new committee will be elected for the coming year. This is your best opportunity to influence change in RINA QLD as we strive to improve the organisation and what it can provide for its members each year. Your attendance and input are greatly appreciated, and I would further encourage you to consider volunteering in some capacity in the year ahead.

Stella Marine Technical Presentation and Factory Tour

Following the AGM, RINA QLD members are invited to join RINA and IMAREST to enjoy a technical presentation and factory tour by Gary Cooper on the marine equipment built and also technical services to the yachting industry.

Stella Marine

Stella Marine story started in 2003 in Brisbane by Gary Cooper, where a single operator with a van and toolbox decided to provide world class quality Australian made products and services to the marine industry. Since then till now Stella Systems opened a workshop in Brisbane Industry park, from there moved to Rivergate Marina, established Stella Systems, started Stella Watermakers in 2011, opened Boatworks

workshop in 2014, purchased Fleet Hydrol manufacturing swim platforms in 2019, Purchased Navigator making quality marine helm chairs in 2022 and finally acquired Australian Davit and Cranes in 2023.

Stella Marine now operates an office and a factory shed in the Boatworks, manufacturing a series of products including Davits, watermakers, swim platforms, sliding tender chocks and water softeners. Also distributing products from various specialists marine suppliers.

Stella Marine also conduct a whole range of engineering services for the marine industry including driveline services, installing bow and stern thrusters, servicing winches and davits, hydraulics works, engine flushing and descaling, sewage treatment plants installations, aluminium and steel fabrication and fin stabilisers installations.

We are listening to Stella Marine founding and management/engineering team on their products, technical and commercial challenges, listening to example projects. Also having a peek at the production line of these engineering products. We already have seen some good questions coming from members on some of Stella Marine products.

Please RSVP by email at your earliest convenience. I look forward to seeing you at the meeting and attending presentation

Kind regards,
Tom Ryan
Secretary, RINA QLD Section
