Implementing Maritime 4.0. in Research and Teaching Activities to Support a Sustainable Maritime Sector

Presented by Serkan Turkmen, Lecturer in Marine Engineering, Newcastle University

Challenges in maritime industry need to be tackled by using innovative solutions. Currently, net-zero target legislation has a high priority. The maritime sector must show its compliance based on evidence.

Current and future generations have the responsibility to take the necessary actions to preserve the marine habitat. This presentation aims to demonstrate the role of Maritime 4.0 in research and teaching to meet net-zero targets and promote sustainable maritime.

FREE ATTENDANCE to ALL those interested!

Continued Professional Development	Certificate of Attendance at Technical Meeting by Branch Committee Member Name Signed
